A Fine Lawn Adds to the Beauty of any Home.

"COAT O' GREEN" LAWN SEED

Coat O' Green Lawn Seed contains only the highest grade of grasses suitable for the purpose of making a beautiful, durable lawn. Our **Coat O' Green Lawn Seed** germinates quickly, roots deeply, this enables it to readily withstand the intense heat of summer and the hard cold of winter, showing beautiful, rich green from early spring to late fall. It contains no annual grasses for making a quick show, to the detriment of a permanent lawn, but has only those which are lasting and hardy. When a lawn is once established from our seed, it lasts for years. From six to eight weeks' time is all that is required to form a close thick turf of rich, velvety lawn when our seed is used.

Vegetables of Merit

BEANS

UNRIVALED WAX. The plants are strong and of good size and one of the heaviest bearers known. The beans are of a pale yellow color and there is not the tendency to stay green as in some other types of wax beans, but they color up all over almost at once. The pods are about six inches long, straight with a slight curve at the tip. It is also one of the earliest wax beans known, and is noted for its resistance to rust and blight. Packet, 10c; $\frac{1}{4}$ lb., 15c; lb., 40c; 5 lbs., \$1.75; 15 lbs., \$4.00; 60 lbs., \$14.00.

SWEET CORN

GOLDEN GIANT excels all other early varieties in size, productiveness and quality, and all of the late varieties in quality and early maturity. It is the one corn for the market gardener who wants the greatest amount of the highest quality corn in the shortest period of time from the smallest piece of land. It is because of the extreme tenderness, combined with the exquisite rich sugary flavor, that the Golden Giant has become the standard of perfection for sugar corn. If you want the best and only the best all you have to do for early, medium, and late sweet corn is to plant the Golden Giant every week or ten days from the time when both the air and ground become warm until within 65 or 70 days of killing frost. Packet, 15c; $\frac{1}{4}$ lb., 20c; lb., 45c; 6 lbs., \$1.75; 12 lbs., \$3.25.

PEAS

PETER PAN. The largest and best of the dwarf varieties. The plant is about 15 inches high and stout and hardy. The pods are dark green, about $\frac{3}{4}$ inches long, broad and straight and having 8 or 9 peas of high quality, and fine flavor. Packet, 5c; $\frac{1}{4}$ lb., 15c; lb., 40c; 7 lbs. \$1.75; 14 lbs., \$3.00.

MELTING SUGAR

Height 4 to 5 ft. Well deserves its name. Should be cooked and eaten pods and all, the same as wax beans. Pods are stringless and when cooked are tender, sweet and sugary—a great improvement over the ordinary Sugar pea. A few rows of this variety should be in every home-garden. Packet, 10c; $\frac{1}{4}$ lb., 20c; lb., 45c; 3 lbs., \$1.00; 10 lbs., \$3.00.

RADISH

EARLY SCARLET GLOBE RADISH. The most popular Radish for either indoor or outdoor culture. In fact more Scarlet Globe Radishes are grown than all the other red sorts combined. It is the standard and if you grow it you can always find a ready market for it. We have an exceptionally fine stock of this seed and we believe that it has made a name for itself. The roots are fairly large, of excellent globe shape and it has a small top. The color is a bright scarlet and the flesh is very crisp and tender. Packet, 5c; oz., 10c; $\frac{1}{4}$ lb., 35c; lb., \$1.25; 10 lbs., \$10.00; 25 lbs., \$22.50.

TOMATO

AVON EARLY. This is a new extra early scarlet fruited variety. The fruits are large for so early a variety, round or slightly flattened, deep scarlet red color, smooth, free from cracks and of fine quality. It produces ripe fruit as early as Earliana and continues to yield marketable fruit for a longer period than the other first early varieties. The vines are vigorous and very productive. We consider this a valuable addition to the list of early tomatoes for the market or home garden. Packet, 15c; $\frac{1}{2}$ oz., 50c; oz., 80c; $\frac{1}{4}$ lb., \$2.75.

MUSK MELON

LAKE CHAMPLAIN is a medium sized melon, nicely netted, flesh deep, sweet and melting, of golden yellow color. The plant is very vigorous and healthy, setting and ripening melons even under adverse conditions, which totally destroyed other varieties. There have been other early melons—and other varieties that are hardy and vigorous but there is none beside Lake Champlain that combines those characteristics with the quality of the late maturing sorts. The flesh is deep, very sweet and melting. The customers who try this melon want it again. The flesh is golden-yellow so attractive to buyers. Packet, 15c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

ASPARAGUS

PALMETTO. Stalks frequently measure 2 inches in diameter, and even when of extra length are perfectly tender when cooked. Pkt., 5c; oz. 10c; ¼ lb. 30c; lb. \$1.00.

WASHINGTON. The Washington is a rust-resistant, vigorous, high yielding strain of Giant Asparagus. Plants grow rapidly and produce uniformly long shoots of superior table qualities. Pkt., 20c; oz., 40c; ¼ lb., \$1.25; lb. \$4.50.

It is the one corn for the market gardener who wants the greatest amount of the highest quality corn in the shortest period of time from the smallest piece of land. It is because of the extreme tenderness, combined with the exquisite rich sugary flavor, that the Golden Giant has become the standard of perfection for sugar corn. If you want the best and only the best all you have to do for early, medium, and late sweet corn is to plant the Golden Giant every week or ten days from the time when both the air and ground become warm until within 65 or 70 days of killing frost. If the following two rules are observed it can be as successfully accomplished as with any other class. All of these offered have been transplanted one or more times and are fine, stocky trees. Sure to grow with reasonable care. All of our evergreens come direct from the field for each order. They are carefully packed and guaranteed to reach you in good growing condition.

planted. Absolutely prevent the drying of the roots. Firm ground well as planted, and keep well cultivated. Seedlings should be lined out about 6 inches apart in a row in the garden and given good culture for about three years before setting in their permanent place. For windbreak plant 8 to 12 feet apart each way, so as to alternate if two rows.

CONKEY'S POULTRY REMEDIES

For more than twenty-five years Conkey has been the Poultry Doctor, let him continue to aid your poultry ailments.

CONKEY'S ROUP PILLS. For convenience in treating individual cases of Roup and also for use in the show room, where coids frequently develop, we are now putting up Roup Pills.

We have planned to get these out for several years, but wanted to have a coating over them that would properly protect them in shipment and at the same time be readily soluble when given to the birds.

This is important, as treatment should be quick—and we found that this feature had evidently been overlooked by other Roup Pill manufacturers.

However, we now have that coating—and the combination is a very desirable one. It will pay you well to always have a box on hand. Box of 75 pills, 30c; box of 175 pills, 60c; box of 400 pills, \$1.20.

CONKEY'S HEAD LICE OINTMENT. For overcoming and preventing murderous head louse which "eats up" baby chicks. Packages, 10c, 25c, postpaid.

CONKEY'S SOREHEAD REMEDY. For dangerous, contagious sorehead or chicken pox, pigeon pox, warts and plan. Attacks the trouble from two angles—a powder for the blood and a salve for the sores. Packages, 25c, 50c; 30c, 55c postpaid; breeder size (lb., salve, 5 lb., powder) \$3.50 or 10 lbs., powder only, \$3.50, \$3.65 postpaid.

CONKEY'S LICE FIX. A preparation in ointment form for fighting body lice. One application lasts a month. Packages, 25c, 50c postpaid.

CONKEY'S GAPE REMEDY. Two different powders—both in same box for one price—one sifted over chicks forces them to cough up parasites, the other is a tonic to put in feed. Packages, 25c, 50c; 30c, 55c postpaid.

CONKEY'S BLACKHEAD REMEDY. Turkey breeders should have a package on hand as blackhead is deadly in advanced stages. Should be given regularly to growing poults. Packages, 50c; 55c postpaid.

CONKEY'S LICE LIQUID. For painting roosts, fittings, inside of house, nest boxes and wherever mites congregate. Cans—qt., 60c; 2-qt., 90c; gal., \$1.50; 5-gal., \$7.00. Parcel post, express or freight, extra.

SAVES MONEY BY SAVING CROPS

It is estimated that rats and mice consume grain each year in the United States alone to the value of more than \$10,000,000. Most of this waste can be saved if Rax is given a chance.

RAX IS NOT A POISON

While it is absolutely deadly to rats and mice, it is harmless to human beings, domestic animals, poultry and birds. It may be used anywhere with complete safety.

RATS LEAVE BEFORE THEY DIE

Within a few days after eating bait prepared with Rax, rats and mice become feverish and seek the open air where they die—outdoors.

HOW TO USE RAX

Add water to the bottle and shake contents until water is cloudy. Then moisten bait (bread, crackers or cheese) with the mixture and place it near the holes. Rax does not affect the taste of the bait.

Directions are furnished with each package. One bottle is enough for an ordinary house; allow one bottle to each 500 feet of floor space in large barns, mills, etc. Price, 75c per bottle, postpaid.

STERLINGWORTH PLANT TABLETS

A New Scientific, Odorless, Concentrated Invigorator for Potted Plants

They are odorless, non-poisonous, uninjurious and are clean and easily handled, and are far superior to plant fertilizers composed of waste material and useless filler. They will make your plants do well.

Price, trial size box sufficient for 10 plants 3 months, 11c, postpaid; box sufficient for 35 plants for 3 months, 29c, postpaid; box sufficient for 35 plants for 8 months, 57c, postpaid.

ACACIA LOPANTHA

Beautiful, half-hardy trees or shrubs with finely lacinated foliage and long racemes of small yellow flowers. In the North they can be used as conservatory plants only, but are perfectly hardy for the southern states. Before planting, soak seeds in hot water until they swell. The hard, shiny black seeds, either alone or combined with beads, make lovely necklaces. For this purpose they must be soaked in hot water (near boiling) until they swell. They should be strung as they swell and become soft. If all do not swell at once, keep the rest soaking in the hot water. After drying, the seeds go back to their natural size and color. One-half ounce makes a nice necklace. Pkt., 5c; ½ oz., 10c; oz., 15c; ¾ lb., 50c.

STIM-O-PLANT

PLANT STIMULANT TABLET

An All-the-Year Fertilizer for Garden and House Plants

Growers of fine flowers, shrubs and vegetables for the best markets and for exhibition, fertilize and stimulate them frequently, a little at a time. An excellent fertilizer for this purpose is Stim-U-plant, an odorless, highly concentrated plant-food, in tablet form, with guaranteed chemical analysis of 11 per cent nitrogen, 12 per cent phosphoric acid, 15 per cent potash. The proportions are accurate, there is no wasted filler, and in this form you apply plant-food exactly when and where and as needed.

MAKE YOUR GARDEN A WONDER

These tablets increase production, heighten color and improve quality immediately. Many professional and amateur growers use them extensively all the year round—from early spring until late fall outdoors, during the winter for pot plants, hot-house benches, etc. They are as fine for evergreens and other trees as for all garden and potted plants.

EASY TO USE

Simply insert tablets in soil near plants, or dissolve in water at the rate of four tablets to the gallon and apply as liquid manure. Complete directions with every package. Order Stim-U-plant tablets with your seed and plant order. Price, trial size, 18c; small size, 29c; 100 tablets, 80c; 1,000, \$3.60.

STERLINGWORTH PLANT FOOD TABLETS

Takes the place of liquid manure. Used by dissolving in water. They quickly start the plants into a healthy and vigorous growth and make them grow and bloom luxuriantly.

Gentlemen:

We have used the Felins Tying Machine for over a year and we find it to be all that you say it is. It really saves us much labor and time and we can bunch on an average about sixty dozen radish an hour, and as we have many hurry calls for such it proves its worth many times a month.

It is well built, speedy and easy to operate and we would certainly recommend it to any one with a great deal of bunching to do, we are,
Very truly yours,
